

Data Sheet

Mining and sale of limestone materials for industry, agriculture, concrete...

Origine :

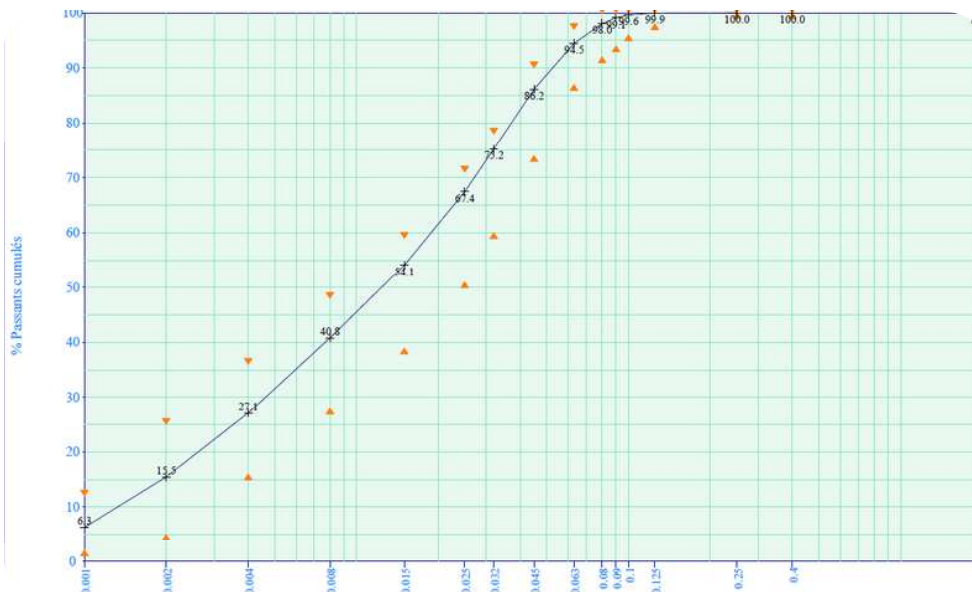

Our calcium carbonates come from an extremely pure deposit in the north of France (Ferques, 62) renowned for their chemical qualities and the high regularity of the grains.

CALC08

Limestone filler

CONCRETE AND MORTARS

carbone footprint
13.37kg CO₂ /
produced tonne

Particle size 0 | 0.80 µm
Norme NF P 18-508
Blaine 545 m² / kg
CaCO₃ 98,52%
D50 9µm

Date of issue : January 2024
